

COMMERCIAL SOLAR

Take advantage of the low cost of commercial PV for MN Xcel Customers utilizing the Solar Rewards® rebate.

If your business is looking to control future costs, solar can maximize your return on investment. The model below reflects MN's "net metering" limit; which insures your solar production is credited at a rate equal to the one you pay. Rebate funds are generous but limited, so contact Able Energy today to take full advantage of these opportunities with superior products and our turnkey installation.

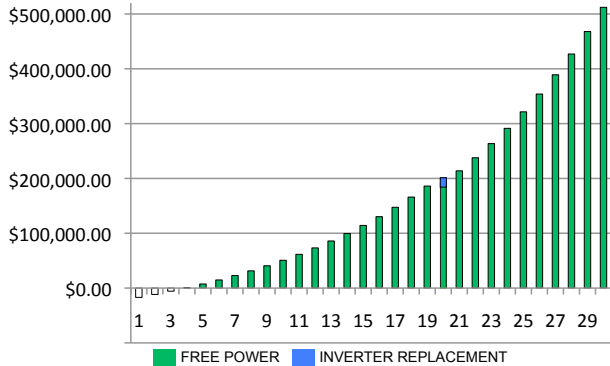

40 kW Commercial System

Installed by Able Energy Co.	\$160,000
30% Federal tax credit*	-\$48,000
